EXAMINER'S COMMENTS

1. Applicant's arguments, see Remarks, filed 29 March 2010, with respect to Claims 1 and 25 have been fully considered and are persuasive. The rejections of 28 December 2009 have been withdrawn.

Jankosky et al. (US'071) teaches that the treatment of the work piece precedes the step of heating to the recited temperature to solve the problem of degassing and blistering which occurs when a metal, such as aluminum, is heated to the recited high temperature; therefore, it would NOT have been obvious to a person of ordinary skill in the art at the time of invention to modify the process of US'071 by heating the workpiece to the recited high temperature before treating the workpiece (see Applicants' Remarks, p. 8, last paragraph to p. 9, first paragraph).

2. Applicant's claim amendments are sufficient to overcome the rejection of Claim 13 under 35 USC 112, first paragraph. The rejection of 28 December 2009 has been withdrawn.

3. Applicant's claim amendments are sufficient to overcome the rejection of Claims 1, 11, 13, 17, 19, 21, 25, and 31 under 35 USC 112, second paragraph. The rejection of 28 December 2009 has been withdrawn.

4. The provisional nonstatutory double patenting rejection of 28 December 2009 is withdrawn.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel Claims 22-24 and 26-27.

REASONS FOR ALLOWANCE

6. The following is an examiner's statement of reasons for allowance:

Claims 1, 10-21, 25, and 28-33 are allowed as patentably distinct over the closest prior art of record. The closest prior art of record is Jankosky et al. (US 2004/0229071).

Regarding Claims 1 and 25, Jankosky et al. (US'071) teach a method for producing surface-modified workpieces made from a metal or metal alloy, comprising the steps of providing the workpiece which is to be modified; treating the workpiece by spraying at least one modifying agent, which is at a temperature of 10 to 50 degrees Celsius and which comprises at least one modifying agent comprising a metal salt in aqueous phase and with a pH of between 6 and 8, of an element from one of transition groups I to VI of the periodic table of elements, a compound of an element from non-transition groups V-VIII of the periodic table, a controlled atmosphere brazing (CAB) flux at least to obtain the surface-modified workpiece.

US'071 further teaches that the coated workpiece is heated to between about 400 to about 600 degrees after treating the work piece, and fails to anticipate or suggest

fairly the order of treating the workpiece after heating the workpiece to within the recited temperature range.

No other prior art that anticipates or fairly suggests the instant claims has been located as of the date of this office action. Therefore, independent Claims 1 and 25 are allowed over the prior art of record. Claims 10-21 and 28-33 are allowed as depending from the allowed parent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALEXANDER WEDDLE whose telephone number is (571) 270-5346. The examiner can normally be reached on Monday-Thursday, 7:30 AM - 5:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Kornakov can be reached on (571)272-1303. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
